PRESENTATION

NG Tech is a full stack IT consultancy and service provider specialized in the integration and commissioning of Technical Solutions. We strive to provide all of the resources expected in an enterprise IT department from entry level process outsourcing (call handling, help desk, etc.) to engineering, administration, operations, even virtual CIO services. We can handle projects, component or functional outsourcing, or the lift and shift of an entire IT department. We use advanced technologies to provide services from three major sectors including; Electronic Security, Information Technology and Telecommunication.

ELECTRONIC SECURITY

- ✓ Video Surveillance (CCTV systems) : Intelligent IP and Analog High Definition
- ✓ CCTV on inter urban Vehicles (Buses, Trucks, Trains)
- ✓ Access Control and Time Attendance Management System
- ✓ Turnstile and automatic gates
- ✓ Access control and hospitality system for hotels
- ✓ Video door bell and private Intercom systems
- ✓ Anti-Intrusion GSM Alarm
- ✓ Fire and gas leakage Alarm
- ✓ Vehicles Alarm systems
- ✓ GPS tracking and navigation for vehicles
- ✓ Sale of hardware and consumables for electronic security

ELECTRONIC SECURITY :

- ⇒ Video surveillance

- ⇒ GPS navigation and tracking

IT NETWORK & TELECOMMUNICATION :

- ⇒ Unified communication
- ⇒ Structured cabling
- ⇒ Mobile communication radios
- ⇒ Point-to-point Wireless bridge
- ⇒ Website & software development

NETWORK & TELECOMMUNICATION

- ✓ Unified communication
- ✓ VoIP corporate telephony with IPPBX
- ✓ VoIP Gateways
- ✓ Help Desk Contact Centers
- ✓ Video conference
- ✓ Instant messaging with bulk SMS application
- ✓ Fax over IP
- ✓ Communication servers
- ✓ Network Infrastructure Cabling
- ✓ Point-to-Point and Multipoint Wireless Bridge
(Interconnecting office sites)
- ✓ Network Administration and management
- ✓ Network Security Solutions
- ✓ Digital Mobile Radio Communication

INFORMATION SYSTEM & TECHNOLOGY

- ✓ Office 365, Zoho, or G Suite SaaS Management
- ✓ Windows Server Administration
- ✓ Linux Administration
- ✓ Storage: SAN and NAS
- ✓ Virtualization (VMware, Hyper-V, KVM, Xen)
- ✓ Hyperconvergence
- ✓ Security: Audits, Monitoring, Remediation

- ✓ vCIO Services
- ✓ Full IT Department Outsourcing
- ✓ Contact Center & Helpdesk Support
- ✓ Desktop Support (Windows, macOS, Linux) and General End User Support
- ✓ General Business Process Outsourcing
- ✓ Software or Hardware Selection and Guidance
- ✓ CTO and Bespoke Software Oversight
- ✓ Vendor Management
- ✓ Backup and Disaster Recovery
- ✓ Cloud Assessment, Design, Migration, Management
- ✓ Website and application software development (Microsoft, Android & iOS)
- ✓ Websites and domain name Hosting
- ✓ Risk Assessments
- ✓ Printer and Network Devices Support
- ✓ Application Support for End Users (MS Office, etc.)
- ✓ Applications Administration
- ✓ License Management
- ✓ Firewalls and UTM
- ✓ Switches, Routers, Wireless
- ✓ Executive and Boardroom Advisory Services
- ✓ General IT Audits
- ✓ Warehousing inventory and stock management systems
- ✓ Hotel management system

A- ELECTRONIC SECURITY

1- Video Surveillance (CCTV) Systems

NG-TECH offers two types of solutions according to your needs, the type of company, your budget, your expectations, and the desired functionalities. Whether you are a large multinational organization (oil and gas industry, bank), a medium sized company, a small business, a shop or a home, we respond to your specific needs

1.1- Intelligent Video Surveillance

This is the best solution for video surveillance, designed with latest technological standards. Our IP cameras have built-in intelligent, automatic rotation and zooming features for long distant objects. Furthermore, they can be remotely accessed from anywhere in the world through mobile applications or a remote monitoring server by an authorized personnel. These cameras are main for:

- **Large Companies:** Banks, Insurance, Hotels, Petroleum Company, Hospitals, Transport
- **Industries:** Warehouse, Factory Department Stores, Automotive Park
- **Government:** Perfect solution for streets CCTV system,

ELECTRONIC SECURITY :

- ⇒ Video surveillance
- ⇒ Access control
- ⇒ Alarm systems
- ⇒ Video doorbell
- ⇒ GPS navigation and tracking

IT NETWORK & TELECOMMUNICATION :

- ⇒ Unified communication
- ⇒ Structured cabling
- ⇒ Mobile communication radios
- ⇒ Point-to-point Wireless bridge
- ⇒ Website & software developement

1-2 Advantages of Our IP Video Surveillance Solution

- Free 24H test, cameras can be monitored remotely via the Internet protocol
- In case of intrusion you receive an email with the image of the intruder on your phone
- 24 Months Electrical Warranty (under Maintenance Agreement)
- 36 Months Equipment Warranty (under Maintenance Agreement)
- Automatic rotation tracking and zooming features
- License plates recognition
- Anti-vandal, heat-resistant
- People identification, 24/7 check-in
- Day / Night Vision

- ⇒ Video surveillance
- ⇒ Access control
- ⇒ Alarm systems
- ⇒ Video doorbell
- ⇒ GPS navigation and tracking

- ⇒ Unified communication
- ⇒ Structured cabling
- ⇒ Mobile communication radios
- ⇒ Point-to-point Wireless bridge
- ⇒ Website & software developement

1.3- AHD (Analog High Définition) Video Surveillance

This solution offers high definition images with AHD cameras. It is ideal for small/medium sized businesses (Pharmacies, Microfinance, shops), and homes.

1-4 Avantages :

- Test free for 24Hours
- Images in high definition
- In case of an intrusion, you receive a pop up alert with image/video on your smart device
- Images are visible day and night
- We offer three years equipment guaranty (based on maintenance contract)
- Receive real time video stream of your CCTV system from anywhere in the world through the internet on your smart phone/tablet or monitoring station (Distance is not a barrier).

2- Access Control and Time Attendance Management System

NG-TECH offers various secure access control and time attendance management solutions based on a set of powerful, reliable and easy-to-use products. These devices differ widely depending on the type of application they are intended for.

ELECTRONIC SECURITY :

- ⇒ Video surveillance
- ⇒ Access control
- ⇒ Alarm systems
- ⇒ Video doorbell
- ⇒ GPS navigation and tracking

IT NETWORK & TELECOMMUNICATION :

- ⇒ Unified communication
- ⇒ Structured cabling
- ⇒ Mobile communication radios
- ⇒ Point-to-point Wireless bridge
- ⇒ Website & software development

2.1- Access Control

This system authorizes or refuses access to a buildings or to specific locations of a building based on the assigned privileges. The identification process is through a badge, a code, finger print recognition or facial recognition.

Avantage :

- Grants and restricts access to facilities
- No need for mechanical key
- Schedule opening and closing times of doors
- Ability to open your door with a remote control, via your smartphone or from a centralized control software
- Monitors the entry and exit doors of employees

ELECTRONIC SECURITY :

- ⇒ Video surveillance
- ⇒ Access control
- ⇒ Alarm systems
- ⇒ Video doorbell
- ⇒ GPS navigation and tracking

IT NETWORK & TELECOMMUNICATION :

- ⇒ Unified communication
- ⇒ Structured cabling
- ⇒ Mobile communication radios
- ⇒ Point-to-point Wireless bridge
- ⇒ Website & software development

- Restrict access based on department (job description), time, or location
- Control and / or limit visitor traffic and staffs

2.2- Time (Attendance) Management System

NG-TECH offers a time management software that integrates all the functionalities necessary for reliable and efficient monitoring of working hours: fixed, variable, team, cyclic (night, weekend), multiple hours, In/Out management, breaks, absences, and overtime. Our solution permits you to easily manage the working time of your employees. All the data entries are automatically recorded in a software. Hence, are treated periodically to track the working hours of employees, such as actual working time, breaks, holiday, overtime and bonuses.

Our software also allows you to track records of employees from all the various remote branches of your company, irrespective of its geographical location.

ELECTRONIC SECURITY :

- ⇒ Video doorbell
- ⇒ GPS navigation and tracking

IT NETWORK & TELECOMMUNICATION :

- ⇒ Unified communication
- ⇒ Structured cabling
- ⇒ Mobile communication radios
- ⇒ Point-to-point Wireless bridge
- ⇒ Website & software development

Access Control & Hospitality Solution for Hotels

We offer advanced hospitality access control system for hotels with easy and flexible guest/visitor management. Our software enables efficient, flexible and comprehensive access management which allow hotel clients to easily control all their access and guest

management needs with one easy-to-use system. It suits hotels of all types and sizes, to provide an optimal guest experience and best utilization of a hotel's rooms, suites and meeting space infrastructure. The software also incorporates the ability to manage a complex organization with regulated access for staff. The password-protected administration area allows management to be done autonomously.

ELECTRONIC SECURITY :

- ⇒ Video surveillance
- ⇒ Access control
- ⇒ Alarm systems
- ⇒ Video doorbell
- ⇒ GPS navigation and tracking

IT NETWORK & TELECOMMUNICATION :

- ⇒ Unified communication

- ⇒ Mobile communication radios
- ⇒ Point-to-point Wireless bridge
- ⇒ Website & software development

1- Video Doorbell Systems

This system permits you to know who is at your front door/gate. The system makes it possible to identify a visitor and to open the door remotely. The system also allows you to open your door with remote control and or with your smartphone.

You'll also get instant notifications on your devices when visitors press the doorbell or trigger its motion sensors. You can connect up to ten iOS, Android, Mac, or Windows devices, so everyone in your family can be plugged in if they want to be. This device also runs entirely on battery power, which means you don't have to worry about hardwiring it to your home. When the battery is out, simply plug it into a MicroUSB cable. A single charge will last up to three months.

ELECTRONIC SECURITY :

- ⇒ Access control
- ⇒ Alarm systems
- ⇒ Video doorbell
- ⇒ GPS navigation and tracking

IT NETWORK & TELECOMMUNICATION :

- ⇒ Unified communication
- ⇒ Structured cabling
- ⇒ Mobile communication radios
- ⇒ Point-to-point Wireless bridge
- ⇒ Website & software developement

2- Solutions for Alarm System

3.1- Anti-Intrusion Alarm System

We can greatly improve the security system of your home/company by installing our GSM/PSTN smart home alarm system. This alarm panel is equipped with built-in microphone and speaker which allows for two way audio intercom. Hence, the system can call up to five preset phone numbers in case of an emergency. Once you receive the call, you will be able to monitor everything going on in the secured facility.

Avantages of Our GSM/PSTN Smart Alarm System:

- Remote management of alarm system from your mobile phone: Arm and disarm the alarm remotely from anywhere in the world.

- In case of an intrusion, receive an SMS or a call which indicates the particular zone triggered.
- The system is equipped with battery to continue running in case of electrical power failure.
- Receive immediate SMS alert on your mobile phone in case of electrical failure

ELECTRONIC SECURITY :

- ⇒ Video surveillance
- ⇒ Access control
- ⇒ Alarm systems
- ⇒ Video doorbell
- ⇒ GPS navigation and tracking

IT NETWORK & TELECOMMUNICATION :

- ⇒ Unified communication
- ⇒ Structured cabling
- ⇒ Mobile communication radios
- ⇒ Point-to-point Wireless bridge
- ⇒ Website & software development

3.2- Fire Alarm Systems

NG. TECH offers IP based fire detection and prevention system for companies, oil and gas industries, industrial parks and warehouses, shops and supermarkets, financial institution, and hotels. The system is equipped with high-tech smoke/gas leakage detectors, sirens, and automatic fire extinguishers which are hard wired to the alarm panel. The alarm panel is then connected to an IT network infrastructure for remote management over the IP network.

In case of an emergency, the system automatically switches on the fire extinguisher, a signal is sent to a central monitoring station with the specific geographical location and GPS coordinates.

Avantage :

- You are alerted before the fire spreads whatever the time of the day or night.
- Easy integration with IP CCTV and access control systems
- In case of an emergency, you receive a call or SMS with the specific location where the incident occurs
- Quick installation, easy to use software and simplified maintenance.

ELECTRONIC SECURITY :

- ⇒ Website & software development

Replace lost or broken remote keys. For gates, garages, cars and more.

We are excited to announce that we can now duplicate up to 80% of factory vehicle keys and remotes, including transponder type and key cutting. We also have a wide range of factory and universal garage and gate remotes.

Some of the work we undertake:

- ✓ Classic Vehicle Re-wiring
- ✓ Installation of Vehicle Security Systems
- ✓ Fitment of Reverse Cameras and Sensors
- ✓ Sound Deadening
- ✓ Vehicle Electrical Fault Diagnosis
- ✓ OE Audio System Integration
- ✓ Factory Audio System Upgrades
- ✓ Marine Audio Installation
- ✓ 4x4 Accessories Installation
- ✓ Driving Lights & HID Upgrades
- ✓ Much More

3- Satellite Asset & GPS Tracking of Vehicles

NG. Tech is a revolutionary leader in GPS tracking systems supplier that delivers customized solution of industry leading GPS Vehicle Tracking System to businesses of all size. Our expertise has shaped & delivered scalable elucidations with substantial business benefits to our clients. Our clients operate fleets of all sizes which they can view conveniently on a PC, laptop, tablet and a mobile phone. NG. Tech is a GPS Vehicle Tracking Systems provider that provides you all services for your business in your ways.

Why NG. Tech?

The advantage of our GPS vehicle tracking system is that it can be personalized to your specific needs without the expenses of creating a completely personalized solution. Our GPS vehicle tracking systems are reliable, tested and robust. That's why we are rated among the top ranking vehicle tracking solution provider for present smart companies. A variety of augmentations can be added to the NG. Tech GPS vehicle tracking system according to the needs of your business.

With so many businesses looking to vehicle fleet management systems to improve efficiency and cut costs, the market is booming. NG. Tech is a great chance for consumers who can expect to find a range of high quality tracking devices at affordable prices.

We employ full-time mechanics specially trained in automotive electrical systems. The best part is that we will come to your location anywhere in the CEMAC region. Large municipal fleets may have aftermarket products and electronics installed at your convenience in your parking lot or yard.

Avantages

- We communicate with you throughout the installation process.
- Real-time fleet visibility
- Control idling, speeding, unauthorized use, and maintenance schedules
- Increase overall efficiency and productivity
- Automatic electronic reporting to eliminate time-consuming paperwork
- Improve response times, give better ETAs, and prove job completion to enhance customer service
- Ensure quick theft recovery by knowing when vehicles or assets are being stolen
- Monitor and track maintenance for vehicles and their subsystems
- Detect early signs of equipment and vehicle fatigue
- Monitors performance based on fuel and/or oil consumption
- Spot potential issues before they become serious problems
- Automatically creates work orders for preventive fleet maintenance and documents activities to help you analyze trends and detect a pattern of problems
- Monitor maintenance by odometer, hours, days, calendar dates, days of the week, or tire depth

B- INFORMATION TECHNOLOGH & TELECOMMUNICATION

1- Unified Communication System

NG. Tech Offers a wide range of unified communication solution with extensive flexibility and mobility features for businesses of all size. This include voice over internet protocol (VoIP) corporate telephony system, video conferencing solution, instant messages, SMS communication and fax. It allows employees to make/receive free calls within the company including video conferencing calls, to make/receive office calls on your mobile phone when you are not on seat regardless of the distance at **ZÉRO** cost.

ELECTRONIC SECURITY :

- ⇒ Video surveillance
- ⇒ Access control
- ⇒ Alarm systems
- ⇒ Video doorbell
- ⇒ GPS navigation and tracking

IT NETWORK & TELECOMMUNICATION :

- ⇒ Unified communication
- ⇒ Structured cabling
- ⇒ Mobile communication radios
- ⇒ Point-to-point Wireless bridge
- ⇒ Website & software developement

Avantage :

- Reduce up to 75% of your telephone bills
- Easy interaction with costumers, colleagues and partners worldwide
- Receive calls directly on your mobile phone when you are not on seat
- Calls all the various remote branch offices for free
- Video conference calls, Call Transfer, and call log management
- Supports more than 5000 phones, 200 simultaneous calls, 64 participants in conference
- Supports Call recording : both incoming and outgoing calls
- Call filtering, hide caller ID, call control and music on hold
- Remote workers can have their registered extension at home and call all office numbers for free.

VOIP GSM Gateway, FXO, FXS, BRI, PRI E1/T1/J1 120 Simultaneous Calls

Notre passerelle VoIP E1 / T1 / J1 prend en charge jusqu'à 30/60/120 appels simultanés. Nous offrons aux petites et moyennes entreprises des ajouts rentables à un système téléphonique existant pour apporter les vrais avantages de la VoIP. Les passerelles VoIP RNIS combler le fossé entre les connexions de téléphonie RNIS classiques telles que les interfaces RJ-48c / T1 communes pour fournir un signal à la plupart des systèmes de téléphonie PBX VoIP.

Modèles avec 16/24/32/48/64 ports

Multiples SIP profiles

Robust Security with TLS/SRTP/HTTPS

Automatic provisioning

Gigabit network interface

LCD screen 128x32 and Multilanguage

- ✓ Reduced cost of telephony
- ✓ Calls can be routed through the most cost-effective GSM / WCDMA operators. Sustain business connectivity
- ✓ Serve and keep in touch with customers and suppliers in offices without fixed lines.
- ✓ Scalable: GSM IP-PBX can easily increase the number of users and lines to meet all need for increasing communication in the future.
- ✓ Simple management: Effectively manage the system via the web interface. Remotely manage dispersed offices to provide unified management and maintenance.

3- Network Infrastructure Cabling

We deliver professional and scalable structured cabling with cutting edge technology to respond to your current and future needs **(data, voice and video)**.

- ✓ Fiber optic cabling
- ✓ Structured cabling with proper ething systems
- ✓ Cable supports and IT rack with patch pannels
- ✓ Project management services

Avantage:

- Network standardization
- Long lasting durability
- High quality performance (voice, video and data)
- A facility of management and growth
- Easy maintenance
- Scalability is assured
- Increased efficiency and productivity
